

Gilchrist Geriatric Care

You may benefit from Geriatric Care services if you:

- **Have a serious illness**
- **Are unable to leave your home**
- **Need assistance** with many of your activities of daily living
- **Are 55 or older**

Our geriatric care team—of geriatricians, nurse practitioners, social workers, and pharmacists—is specially trained to meet the unique needs of older adults. **For homebound seniors with advanced chronic illnesses, we offer comprehensive care designed to enhance quality of life**, ensuring they can safely manage their health at home. By addressing physical, emotional, social, and spiritual needs, we help aging adults facing serious health challenges live as comfortably as possible.

How Can Geriatric Care Help You?

Gilchrist's team of experts in primary care provide:

- Comprehensive **health assessments**
- Customized and coordinated **care at your home**
- Support for your **goals of care**
- Help making decisions through **advance care planning, and education and guidance** about the likely progression of your illness
- **Reduction in stress** for caregivers and their loved ones
- **24/7 on-call support** during a health care crisis, and a visit within two working days for urgent needs
- **Education on living with your illness**
- Assistance accessing available and needed **community resources**

Can I still receive Medicare home health services while under Geriatric Care?

Yes. Geriatric Care and Medicare home health services are billed separately. You can receive support from both services simultaneously.
